PAVAN KALYAN ITREDDY

Cloud Engineer | Azure, AWS & GCP | Multi-Cloud Architecture, Security, DevOps & Migration

Hyderabad, India | +91 9390430181 | kallyanreddy45@gmail.com | linkedin.com/in/itreddy-pavan-kalyan-reddy-638a3b256

PROFESSIONAL SUMMARY

Cloud Engineer with 3+ years of experience designing, migrating and operating enterprise workloads across Microsoft Azure, AWS and Google Cloud (GCP). Builds secure Azure landing zones, runs cloud and data migrations from on-premises VMware, AWS and GCP, and automates delivery with Terraform, Azure DevOps and GitHub Actions. Hands-on with Kubernetes (AKS), containers, web apps, databases, networking, identity, security and governance, monitoring and cost optimization. Certified on Azure, AWS and Google Cloud.

CORE SKILLS

Cloud Platforms: Microsoft Azure; Amazon Web Services (EC2, S3, VPC, IAM); Google Cloud Platform (Compute, Storage, Networking, Service Accounts); multi-cloud and hybrid cloud architecture

Cloud Migration & Architecture: Datacenter exit, cloud migration, data migration, Azure landing zones, discovery and assessment, dependency mapping, migration wave planning, rehost and replatform, Azure Migrate, Azure Site Recovery, replication, cutover, hypercare, SAP migrations, HLD and LLD, VMware ESXi, backup and disaster recovery

Kubernetes & Containers: Azure Kubernetes Service (AKS), Kubernetes, Docker, container-based solutions, OpenShift (working knowledge)

Web Apps, APIs & Integration: Azure App Services, Azure Functions, Logic Apps, REST API-based automation and integrations, Event Hub

Databases & Data: SQL databases, Oracle, Cosmos DB, Azure Data Factory, data migration, Azure Backup, Recovery Services Vault

Infrastructure as Code & DevOps: Terraform, ARM Templates, Bicep, Azure DevOps Pipelines, GitHub Actions, Jenkins, CI/CD, Git, Ansible, PowerShell, Azure CLI, Bash, Python, Automation Accounts

Security, Identity & Governance: Microsoft Entra ID, IAM, RBAC (custom roles), managed identities, Azure Policy (policy-as-code), Azure Key Vault, NSG, Private Endpoints, secure configuration, compliance

Networking & Compute: Virtual Networks, VPN, DNS, Load Balancers, Private Endpoints, Virtual Machines, VM Scale Sets, Azure Virtual Desktop, Compute Gallery, Windows Server, Linux

Monitoring & Cost: Azure Monitor, Log Analytics, Application Insights, CloudWatch, Grafana, Dynatrace, Datadog, Splunk, dashboards, alerting, Cost Management, cloud cost optimization

AI & Operations: Azure AI Foundry, AI infrastructure, ServiceNow, incident and SLA management, patching, runbooks, Agile (Scrum, Kanban)

PROFESSIONAL EXPERIENCE

Cloud Engineer II (Specialist) | HCLTech, Hyderabad, India | Aug 2025 - Present

- Deliver datacenter exit and cloud migration programs to Azure from on-premises VMware ESXi, AWS and Google Cloud, covering discovery, assessment inputs, landing zone setup, replication, cutover and validation.
- Build Azure landing zones with networking, identity, security and governance controls (RBAC, Azure Policy, Private Endpoints, NSG), provisioned with Terraform and Azure DevOps CI/CD pipelines.
- Set up Azure Migrate replication, run cutovers in migration windows, and provide hypercare, resolving post-migration issues and tuning VM performance and cost.
- Worked on SAP migrations: provisioned VMs, networking, landing zones and volumes, supported data migration for each environment, and took part in the live production cutover.
- Plan migration waves and assess applications with client stakeholders, including dependency mapping and selecting the right migration type (rehost or replatform).
- Contribute to HLD and LLD discussions; write runbooks and post-migration documentation for BAU handover.
- Support incidents, service requests and troubleshooting across Azure, AWS and Google Cloud.

Cloud Engineer I (Analyst) | HCLTech, Hyderabad, India | Sep 2023 - Aug 2025

- Provisioned, managed and troubleshot Azure IaaS and PaaS: VMs, VM Scale Sets, App Services, Functions, Azure Virtual Desktop and Compute Gallery images, plus AWS workloads; configured networking, backup and disaster recovery.
- Supported container-based solutions on Azure Kubernetes Service (AKS) alongside web apps on App Services and Functions.
- Handled production support for enterprise customers: incidents in ServiceNow, patching, and monitoring with Azure Monitor, Log Analytics and Application Insights; built dashboards and reports.

- Applied governance and access controls using custom RBAC roles, managed identities and Azure Policy at resource group and subscription level; managed certificates and key rotation in Azure Key Vault.
- Automated routine tasks and built Azure integrations using APIs, PowerShell, Azure CLI, Logic Apps, Automation Accounts, Terraform and Azure DevOps pipelines; reduced cost through capacity planning.
- Ran weekly status reviews with client leadership and tracked escalations.

Intern, HCL TechBee Program | HCLTech, Noida, India | Aug 2022 - Sep 2023

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Certified DevOps Engineer - Professional (DOP-C02)
- Google Cloud Associate Cloud Engineer

EDUCATION

Bachelor of Computer Applications (BCA), SASTRA University, Thanjavur | 2023 - 2026 | CGPA 8.6/10

ACHIEVEMENTS

- Best Performer / Distinguished Performance Award, three consecutive years (2023-24, 2024-25, 2025-26).
